

DIDSBURY PIONEER

VOL XXXII, No. 9

DIDSBURY, ALBERTA, THURSDAY, FEBRUARY 28, 1935

\$2.00 per year. 5 cents a copy.

Municipal District Election.

The result of the election in the Mountain View Municipality, No. 310, returned a new councillor in Division 3. Mr. James Rupp defeated the retiring councillor, Mr. W. J. McCoy, by a majority of 34.

The vote was the largest polled for a number of years, 158 ballots being cast. Mr. Rupp received 96 against Mr. McCoy's 62.

In Divisions 1 and 2 Messrs. W. Archer and Percy Saunders were elected by acclamation.

In Westerdale Municipal District the elections were in the three northern divisions, and the voting in Division 4 was fairly close. Councillor Bates being elected by a majority of 12 over Mr. W. F. Nidrie.

Reeve George Clark in Division 5 was returned unopposed, and Mr. Charles Brown, a newcomer to the council, was elected by acclamation.

Salvation Army Leader to Visit Didsbury.

Major Joseph Acton, who is at the head of the Salvation Army in Alberta, will make his first visit to Didsbury when he will deliver an illustrated lecture on "Alaska" in the basement of the Evangelical Church Tuesday evening, March 5. Many people who have seen and heard this lecture claim that it is one of the finest of its kind. His slides of Alaska are choice, his information educational and interesting, his relics and curios unique.

Major Acton has been in Salvation Army work in all the western provinces, and for the last six years together with his wife and son has worked among the Indians in Alaska and Northern B.C. His work has given him a wealth of first hand information of the northern part of the hemisphere which has been sought after by many writers.

WEEKLY SERMONETTE

"God's beautiful pastures are always green, when everything else is bare and brown."

Canadian Legion Bid Padre Farewell

There was a good attendance at the meeting of the Canadian Legion on Saturday evening, when the comrades bid farewell to their padre, Rev. A. J. Mitchell.

In presenting Mr. Mitchell with a gold Legion badge as a farewell gift, the president, Mr. J. Robertson, expressed the appreciation of the members to their padre for the help he had given them during the term of his office, and wished him a full return to health.

Mr. Charles Marden also spoke as to the respect in which Mr. Mitchell was held by all the members.

Mr. Mitchell thanked the members for their gift and said it had been a pleasure to work with the Legion, remarking that Didsbury had one of the finest lots of returned men he had ever worked with.

A program, consisting of community singing by Messrs. Roland Webster, Alec Robertson, W. Gillrie and Jack Robertson, was much enjoyed.

It was announced that a social gathering would be held in the Odd Fellows Hall on Wednesday, March 6, when all returned men and their wives will be welcome.

Successful Band Concert

The concert given by the Boys Band on Friday night was well attended and the audience was very appreciative.

The band selections, mostly of a higher standard than given at former concerts, were rendered in a manner which showed the band had advanced considerably during the past few months.

Mrs. Wood delighted the audience with two songs, and Miss Evelyn Liesemer gave cello solos in her usually efficient manner. Messrs. Weidenhammer and Gill of Calgary contributed several flute duets which were extremely well rendered and rounded off a splendid musical evening.

Dr. Liesemer, the conductor and band leader, is to be commended on the excellent work he is doing in connection with the band.

LOCAL & GENERAL

Mrs. J. A. McGhee is visiting friends in Edmonton this week.

Miss Mollie Pearson spent the weekend visiting Edmonton friends.

Mrs. Astell of Raven River is visiting with friends here this week.

Mrs. Dan Geiger underwent an operation on Wednesday. We are glad to report she is doing nicely.

Mr. Harry Gibson left on Friday for Vernon B.C. to attend the funeral of his sister.

Mr. A. West of the University of Alberta, was a guest at the McGhee home on Sunday.

Mrs. C. G. Carlson and Miss Carlson were visitors to Calgary last week end.

A dance will be held at Grand Centre School on Friday, March 8, under the auspices of St. Cyprian's A.Y.P.A.

Miss Ruby Farrell who has been visiting with Dr. and Mrs. Clarke left for her home in Edmonton on Monday.

News has been received of the death at Vernon B.C. of Mrs. Brucis, the daughter of Mr. and Mrs. Robert Gibson, who died on Feb. 22nd.

The car of salt which was to have been unloaded on March 1 and 2 has been delayed and now will be unloaded on March 8 and 9.

Do the ladies wish to curl in a mixed bonspiel? Only four ladies have handed in their names. Hand names into Rantons now.

Archie Boyce is planning a community auction sale about the middle of March. If you have anything to sell list it with C. E. Reiber.

Mr. James Hoesgood shipped a carload of cattle on Wednesday through the Mountain View Livestock Marketing Association.

J. V. Berscht is offering lots of good bargains on his 2 Big Dollar Days, Friday, Saturday, and Monday, March 1, 2 and 4. Be on hand early, as the quantities in some of the lines are limited.

Mrs. Nyle Hunsperger, District Deputy Grand President and Mrs. Chas. Mortimer, District Deputy Grand Marshal, installed the officers at the Crossfield Rebekah Lodge on Monday evening.

A Social Credit Group was formed Monday evening at Sunnyslope School following an address by Mr. Unwin. Officers elected were: President, Mrs. Guy Sunberg; Vice-President, Mrs. J. Somerville; Secretary Miss G. Ferguson.

Pound Notice

Impounded in the pound kept by Henry Farrant, located on the S.E. 1/4-32-3-5, on the 12th day of February, 1935, and sold on the 25th day of February, 1935. One Polled Hereford Cow, 4 or 5 years old, branded M.U.R. on left hip, also A over K on right hip, the brands being indistinct, to E. Landeen of Didsbury, Alberta.

Impounded in the pound mentioned above and sold to Ivan Graham of Didsbury, Alberta:

1 Holstein Yearling Steer, no visible brand.
1 Black Yearling Heifer, no visible brand.
1 Jersey Yearling Heifer, no visible brand.

For further information apply: A. McNaughton, Sec. Treas., M.D. 311, Didsbury

Farewell to Rev. & Mrs. A. J. Mitchell

Rev. and Mrs. A. J. Mitchell were honored a farewell gathering at the United Church on Tuesday evening when a large number of the congregation of both Didsbury and Westcott were present. Mr. H. W. Chambers occupied the chair.

Mr. J. A. McGhee presented Mr. and Mrs. Mitchell with a purse in token of regard from the members of the congregation, and Mr. Mitchell replied thanking the people of both Didsbury and Westcott for their co-operation during his ministry here.

A program of musical numbers was given during the evening.

DIDSBURY EAST MUTUAL TELEPHONE COMPANY

A meeting of subscribers to the Didsbury East Mutual Telephone Company, and those interested, will be held at the Community Hall on Monday, March 11 at 2 p.m. sharp for a general discussion of the project, and if the project is favorably received, the passing of the by-laws of the Company.

W. M. SMITH, PRESIDENT

Evangelical Church Notes

The sermon subject on Sunday morning will be, "The Goodness of Christ." In the evening the Pastor will deal with some of the reasons for our present social unrest. His sermon is entitled, "Divine Security."

Thank You!

I wish to thank all those who supported me and elected me to the office of councillor in Division 3, Mountain View M.D. I can assure you that I will work for the best interest of the ratepayers.

Jas. W. Rupp.

A second Social Credit Group was organized at a meeting held on Monday evening. Mr. F. Moyle was elected president, Mr. A. G. Studer, vice-president and Mr. Ray Lantz secretary.

Mr. Fred Hyde reports that the poplar are showing bloom in the west country—A bystander remarked that perhaps the reason was that Social Credit was getting so hot in that district.

Mr. March Cunningham of Edmonton, accompanied by Mrs. Cunningham, called on the Ranton family on his way to take part in the MacDonald-Brier Curling finals at Calgary.

Messrs. J. McGhee, D. Edwards, F. Kaufman, A. McNaughton and F. Hesselton went to Calgary on Saturday to witness the MacDonald-Brier finals. In the evening they curled a friendly game with a crack Calgary rink at the Glencoe club. They lost the game and their alibi is that their coats were too tight.

Fatal Accident East of Town

A very sad accident occurred east of town last evening, when Mrs. Annie Elliott, daughter of Mr. and Mrs. William McCulloch and her four-year-old son were run over by a truck driven by her brother, Mr. Jim McCulloch, and instantly killed.

Mrs. Elliott had been living in Calgary, and together with her son in her brother's truck, was coming to stay for a time with her parents. It appears that the boy had been sick and they opened the door to give him relief. When near Mr. George Burns' place the truck struck a bump in the road and both mother and son overbalanced and fell out of the truck and were apparently dragged under the wheels.

Dr. Clarke, coroner, was called and he decided to hold an inquest Friday morning at 10 o'clock.

Curling Notes.

All the skips were demoted and the third men raised at the meeting of the Curling Club held on Monday night, when a new list of skips was chosen for the second schedule. It was decided that the men who had skipped in the first schedule should play third for the remainder of the season. The following rinks were chosen, the first-named being skip: Bellamy, Sinclair, McCoy, Eckel, Jim Caithness, Brusse, Carleton-Blain.

Dunlop, McCoy, Adshead, Moyle, Heselton, Julien, Ross, C. Smith, Kaufman, McNaughton, Wallace, Becker.

Kirby, Fisher, Jack Caithness, J. Morgan.

McFarquhar, Halton, W. G. Liesemer, Robertson.

Ranton, Studer, Morris, H. M. Reiber.

C. E. Reiber, Clarke, Edwards, Symington.

Weber, Berscht, Baines, Booker.

Woodlock, Johnson, Friesen, T. Wyman.

Wordie, McGhee, Halliday, Gibson.

W. Wyman, Pitt, Nowak, Behr.

Saturday night is an open night at the rink, and all postponed games in the first schedule should be played off.

Doings Of Our Neighbors.

At Crossfield: At the annual meeting of the Rosebud Municipal District, Councillors Stewart, Murdoch and Davis were re-elected by acclamation.

At the annual meeting of the Beaver Dam Municipality Councillors Giles, W. Moore and George Haag were re-elected by acclamation.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Iyeman Tokugawa, retiring Japanese minister to Canada, left Ottawa recently for his new post as Japanese minister to Turkey.

George Jihlavec, 50, Dugald, Man., farmer was instantly killed when the truck he was driving crashed into a 60-foot pole protruding from the rear of another truck.

Stephen Leacock, Canadian humorist, was presented the Mark Twain medal, awarded annually by the Mark Twain Society. Leacock is professor of economics at McGill University.

Under the farm-help relief plan, 4,400 single unemployed men have already been placed on Manitoba farms this winter and the relief commission expected last winter's total of 5,140 placements would be exceeded.

Some form of agricultural output restriction was an imperative need to benefit the next growing season, E. D. Barrow, M.L.A., provisional president of the new British Columbia Chamber of Commerce, said in an address to the advertising and sales bureau of the Vancouver Board of Trade.

Total forest fires damage in British Columbia during 1934 was \$993,481, highest on record with the exception of 1925, Hon. A. Wells Gray, minister of lands, reported. The damage was three times greater than the previous year, and the area burned over, 649,611 acres, was more than double that of 1933.

William Gillespie, Thessalon, Ontario, farmer, revealed he was investigating a report a white woman who might be his sister had been found among Indians of Link Lake, near the Ontario-Manitoba boundary, almost half a century after she disappeared on a berry-picking expedition. Maud Gillespie, the sister, disappeared 46 years ago at the age of 12.

Trying Out Welded Rails

Experiment Being Made In Germany By State Railway

Welded rails are being used in tests being made by the German State Railway to determine whether they can be used at high rates of speed and whether they cause any bad effects to the trains. A trial railroad line has been constructed of welded rails, each approximately 98 feet long and so connected that there are practically no joints. An express train, without passengers, will be driven over this line until a mileage of about 62,500 is attained. These tests are to last about three months with 19 trips being made each day at a speed of from 75 to 95 miles an hour.

Experiments conducted in the Catholic University of America, Washington, D.C., tend to prove that smoking dulls man's sense of taste.

Tests Were Successful

Novel Diving Suit Easily Handled And Quickly Put On

Tests of a novel diving suit for saving drowning persons, just completed in the lake at Geneva, Switzerland, are reported to have been successful. The suit was invented by Commander Prieur of the French Navy. The essential point about it is that the diver wears a breastplate which is really a steel bottle of compressed air. The whole suit is easily handled and can be put on in 30 seconds. The diver can remain below the surface for about 25 minutes. He is quite free of the ropes or air tubes which usually connected divers with a boat overhead. At the public demonstration three men remained under water for a long period.

"Cheap Flying For Masses"

Aviation Club In England Has Over 400 Members

With the slogan, "Cheap Flying For The Masses," the Northamptonshire Aviation Club reported at the opening of its clubhouse recently at Sywell, England, that its plan is a success. It has more than 400 members, the majority being small merchants and artisans. The subscription is \$6.25 a year and the club finance instructions to the extent of \$5 an hour, providing the student gets his flying license within eight hours. The club is expected to become the largest civil aviation organization in the country.

FASHION FANCIES

DESIGNED ESPECIALLY FOR MATURE FIGURE TO DISGUISE OVERWEIGHT—AND IT DOES IT BEAUTIFULLY

By Ellen Worth

This charming dress of black satin back crepe expresses simple dignity for the mature figure. The vestee is white starched lace. The rever collar is outlined by shiny surface of the crepe, which makes a very effective trim. There is slight fullness toward the hem of the length-giving paneled skirt, which gives nice freedom for walking.

You'll be astonished how quickly you can make this dress and for a very nominal sum.

Pebbled crepe silk, lightweight woolsens, velvet, etc., are equally lovely to carry it out.

Style No. 993 is designed for sizes 36, 38, 40, 42, 44, 46 and 48-inches bust. Size 36 requires 4 1/2 yards of 39-inch material with 1/2 yard of 18-inch or wider contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine. Pattern and magazines are mailed post paid.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

Little Journeys In Science

THE ELECTRON

(By Gordon H. Guest, M.A.)

Electricity is one of man's most useful servants and has added much to our bodily comforts. Some years ago scientists began to wonder as to the nature of electricity. It is only within the last thirty years that the electron theory has been developed. In 1891, a scientist, G. Johnstone Stoney, suggested the name electron for the natural unit of electricity. The modern scientist believes that negative electricity consists of electrons and it has been shown that it takes 1845 electrons to weigh as much as one hydrogen atom. It is usually considered by scientists that matter is granular and electrical in nature. There is very convincing evidence to prove that the hydrogen atom is made up of one positive electron called a proton and one negative electron, which is usually called the electron.

What is called an electric current is now believed to be simply a flow of electrons through a wire; and it is considered that good conductors of electricity such as gold, silver and copper, have a good many electrons loosely held. In the case of non-conductors, it seems that there are few free electrons.

When a glass rod is rubbed with silk, the negative charge taken on by the silk is due to the fact that some free electrons are rubbed off the glass; while the glass, having lost electrons, takes on a positive charge. In general, it is assumed that a neutral body takes on a positive charge when it loses electrons, and a negative charge when it gains electrons.

Lightning can also be explained by means of the electron theory. Electrons, or charged molecules of air, serve as nuclei around which moisture of the air may condense. In time the droplets grow in size until they fall as rain-drops, and it appears that they carry down large numbers of stray electrons, the final result being that a very great potential is developed, followed by the passage or a "bolt" between the cloud and the earth.

Will Use Autogyros

British Admiralty Adding Them To Naval Aviation Units

The British admiralty has decided to add autogyros to its naval aviation units, the Daily Telegraph reported.

Commenting on the reported decision, the newspaper's naval expert, Hector Bywater, declared:

"Under the present circumstances airplane carriers are indispensable. The admiralty, however, would welcome a perfected autogyro or airplane able to land in a small area, rendering unnecessary large airplane carriers, which are burdensome and vulnerable."

RUN DOWN? TAKE WINCARNIS

If work and worry have got the better of you and you are feeling weak and listless, follow the recommendation of more than 20,000 medic men. Take Wincarnis three times daily.

To thousands who once felt as you feel now, this advice has proved invaluable. Wincarnis brings to you all the valuable elements of grapes (2 1/2 lbs. in each bottle), and the strength building content of beef and malt extract. It is not a drug, but a delicious, blood and tissue building wine which quickly soothes tired nerves and builds new wells of energy.

From the time you start taking Wincarnis you will sleep better, wake more cheerfully, and feel more nearly as you should. You will know, then, how wonderful it is to be on the road to sustained, vigorous health.

For those who are run-down, or who suffer from ragged nerves, insomnia, anaemia or debility, Wincarnis is a marvelous tonic. Get Wincarnis from your druggist today. —Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

An Outstanding Tragedy

World Remembers Collapse Of Tay Bridge In 1879

There have been a few outstanding tragedies in the world's history which have photographed themselves on men's minds so that neither time nor circumstances seem able to obliterate them. The Lisbon earthquake, the last day of Pompeii, the loss of the Titanic, these are instances of them. What happened this night in 1879 is yet another.

It is one of those stories which are quickly told yet leave much to the imagination. The necessary facts to bring it to the mind, to conjure up the horror of it, are few indeed. We need only to know that in 1878 the first great bridge over the River Tay, in Scotland, was built. It was nearly two miles long, had 84 spans, and was 90 feet high. One of the wonders of the world at that time, it was destined to stand but a few months. As this night in 1879 the sun went down in a wreck of scattered clouds. There was a high wind which increased in velocity till it blew with tremendous force, sweeping up the river at incredible speed.

In the blackness of that terrible night a train with its human freight rushed across the bridge, but never reached the other end. In an instant 13 of the great spans were lifted bodily, swayed a moment over the black waters of the river, and then crashed with the train and all who were in it.

Out of time into eternity they went. The world shuddered. So, at that great price, was bought the knowledge whereby a stronger bridge was built. —Ottawa Journal, Dec. 28.

Receives New Titles

Prince Of Wales Has Three Added To Long List

The Prince of Wales received the most extravagant New Year's gift of his life when King George made him an Admiral of the Fleet, a General of the Army and Chief Marshal of the Air Force at the same time.

The award of three such honors to the same person at the same time was unusual and many theories are being advanced to account for it. Some who take an interest in the private lives of royalty suggested that the Prince must have promised to settle down and marry in the coming year and that the King was showering him with honors in return. Others thought the King had simply taken another opportunity to show his affection for his eldest son, who is one day to become ruler of the British Empire.

In any event the Prince will ascend the throne with virtually all the secular titles any Briton can hope to have. He is already a duke, an earl, a baron, a colonel of seventeen regiments, an officer of half a dozen orders of chivalry, a Knight of the Garter, a Knight of the Thistle and Master of the Merchant Navy and Fishing Fleet. It will be nothing unusual for him to find himself suddenly Emperor of India and Defender of the Faith when he becomes King.

Certainly Holds Record

North Bay Man Uses Same Collar Button 41 Years

Northern Ontario does not only hold world supremacy by way of its famous Dionne quintuplets, but now it claims at least a neck lead for ancient collar buttons still in duty.

John Small, J.P., and former North Bay tax collector, announces a record, that makes all former marks fade into the background. He has worn the same collar button for 41 years, and has never once had to search for it under the bed.

Just recently, Mr. Small read of the English champion, who claimed to have worn a five-cent collar button for 35 years. This gave the North Bay man a laugh, for he received his collar button with the purchase of a shirt.

Carried Hot Meal

Baked beans, codfish and potatoes, a typical New England meal, were cooked at Portland, Maine, and, still hot, served for supper in Portland, Oregon, the same night. It was the start of the new air express transportation service between northern New England and the Pacific coast.

FALSE TEETH

DR. WERNET'S POWDER HOLDS FAST

When this dentist's grand prescription for holding plates firmly, snugly and comfortably in place has the largest sale in the world — there's a reason — ask your dentist — he prescribes it — never causes soreness — inexpensive.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Have you had your handwriting analysed by this well-known graphologist? Join the throng of those who have done so, and learn what your writing tells about you).

Another batch of extracts from replies mailed this week shows the scope of the interest aroused by this series of articles. Letters are coming in from coast to coast, and in practically every case, a graphological analysis is able to reveal the help that is needed.

Miss "Nellie": The outstanding characteristic in your nature is your procrastination. You put off doing things that demand immediate attention. This is one of the worst of the minor traits of character, and I strongly advise you to cultivate more promptitude and decisiveness.

Miss J.—, Toronto: Have nothing to do with your married man friend. He is not quite the innocent sufferer he pretends to be. I imagine that if you were to have a talk to his wife you would find that he has chronically neglected her, and that he has always had a passion for other women. Leave him alone, or the day will come when you will be sorry you ever met him. His handwriting is strongly unfavourable.

H.—, Winnipeg: By all means take up a course in advertising make-up. You certainly have a talent for this kind of thing, and you will not go far wrong in working hard at it. This is one of the most lucrative vocations that a young man can embrace.

Mrs. —, Sarnia: The only thing to do with your husband is to show him that he is merely alienating your daughter by treating her as a school-child. He, like many other fathers, forgets that he was once young himself, and that it is too much to expect that young people will see eye to eye with maturity. His writing indicates that he is somewhat domineering, and that he likes to "rule". But he must understand that he cannot rule the lives of his children for ever. And, judging by your daughter's handwriting, she is well able to look after herself.

Mrs. "Worful": The trouble with you is that you are giving in to your worries too easily. You should be cultivating outside interests, providing as much variety for yourself as is possible. To nurse your troubles, and not only that, but to imagine worries that are non-existent, is merely to create a neurotic condition, and, after all, it is so needless. Take hold of yourself and shake off those nervous cobwebs that are gradually encircling your mind. I have written you, suggesting a regimen for you to follow.

Miss E.—: You are at an age when you are inclined to exaggerate these lovers' tiffs. At 19 it is hard to feel complacent when things go wrong in one's love affairs, but time will show that you had nothing to fear, because I am convinced that the young man was sincere when he told you that he loved you, and before long, things will turn out alright again. In any case, you are rather young to feel that your life is blighted, whatever the outcome.

Have you any problems that are worrying you? Do you want to know what your handwriting reveals? You may be surprised at the revelations. And an analysis often tells you things about your friends that you did not know. Send specimens of the writing you want analysed, stating birthdate in each case. Send 10c coin for each specimen, and enclose with 2c stamped addressed envelope, to: Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters are strictly confidential. Replies will be mailed out as quickly as possible but please allow at least two weeks for a reply.

Parent, concluding the recital of his exploits: "And that, my boy, is what I did in the Great War."

Son: "But, Daddy, why did they want so many men beside you?"

A Law Every Mother Should Know and Observe

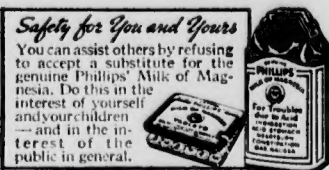

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this; the finest men know. Made in Canada.

PHILLIPS' Milk of Magnesia.

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

CHAPTER IX.—Continued

"I thought he was lyin' about havin' lost that notebook," he muttered disgustedly. "It's just barely possible that Corse or Gray may have found it. I'll have to find out that. Anyhow Peyotl will never tell what took place up here. . . ."

He knew that he was perfectly safe. Though old Kane was fairly well known in Seco yet at times he had been gone more than two years without exciting comment.

"I'm the only one who knows about this find," muttered Dustin. "And it's a cinch now that no one will tell about Corse and Gray rustlin' the Hour-glass stuff. Come on here, Peyotl," he shouted. "Give a hand here."

Together they carried the limp figure to the narrow trench and laid him at rest under the desert stars. Afar a coyote on a distant, wind-bitten ridge sent up a wailing howl as Peyotl slunk off to the fire and shivered over the flames. Two hours later they got their ponies and headed slowly back for the yellowing flatlands under the rising sun.

CHAPTER X.

That telegram from Gerald Keene caused hot debate at the Hour-glass. Old Joe Carr was lifted to the Seventh Heaven of anticipation. The nephew of his old partner, himself half-owner in the ranch, could do no less than help.

He held conference after conference with Crewe, and Stone, because of his alleged intimacy with Gerald Keene, was called into those meetings. Plan after plan was disputed by the fierce-eyed old cattle-man.

"I know Dustin's got his knife out for me," he said. "I know his gang of thieves has been stealin' me deaf, dumb an' blind but I got no proof."

"Stone has," said Crewe. "Tell him what you told me about seein' Corse and Gray ear-markin' that calf," he said.

Stone told and Carr's face was a

ARE YOU WEAK?

Mrs. W. Bowman of 10 Wheeler Ave., Guelph, Ont., said: "I had lost weight through poor appetite. I had backaches and headaches and felt miserable. I took Dr. Pierce's Golden Medical Discovery and was soon enjoying splendid health."

All druggists. New size, tablets 50 cts., liquid \$1.00. Large size, tabs. or liquid, \$1.75. Write Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

W. N. U. 2082

study. Finally he rose and shook his finger menacingly under Stone's nose. "You been drawin' our pay," he said. "You been eatin' Hour-glass grub an' when you find two Broken Spur men stealin' cattle you say not a word about it. You tell only my manager and even he keeps it from me. I can't sate it a-tall."

"I had a darned good reason for only tellin' Crewe," said Stone evenly; "and Crewe's got a good reason for not tellin' you. I saw 'em—yes. The word of one witness will not convict any one. There would be two of them against me. You'd never get anywhere on my evidence alone. We need more than that. . . ."

Crewe nodded agreement and that angered Carr still more. He snatched a decanter from the shelf and poured him a gargantuan drink.

"Dog-gone you," he snarled. "Between you, you're goin' to bust me. . . ."

"Listen to me, Joe Carr. . . ." Crewe went into action suddenly. "You an' me's been friends for twenty years. You been tryin' to run your business against a bunch o' crooks. You might have done it but for that. . . . He jerked a hand at the decanter. . . . "Stone is playin' as square as he knows. Of course he's green to the cow-country and he don't know a hell of a lot. He brung you in some good dope. We know now that Dustin was keepin' a wagon in the hills with a bunch of men stealin' everything they could find. We know that he was grub-stakin' old man Kane. Why? That's what I want to know? That notebook that Gray flogged out of Corse's pocket looks funny to me. . . ."

At that moment Edith came in, flushed from riding, and stood watching them. Her gaze took in the red notebook that Carr had laid on the table; then it went to Stone. She found herself wondering about Stone. There was no question of his eternal greenness! The very cows would eat him—yet . . . ? On every occasion when he had been tested he had come out successful. Her puzzled gaze went past Stone to where, on the porch, Red Thom was flicking bits of adobe at a lizard. Then she heard her father speak:

"Now about that notebook we were talkin' of . . . I'll get it."

He got it from his desk and studied it wordlessly for a full minute.

"Of course old Shammy-skin Kane's a fool," he said. "He's been wonderin' foot-loose over the ranges for so long that his brains are addled. They get that way sometimes. But I don't believe he's big fool enough to tie himself up with Dustin unless he's got a stranglehold on him. I'd like to find the old fool and find out what he thinks he's found. Let's see. . . . And again he fell to studying the book.

"One half to Dustin. . . . Huh! That means of course that Dustin's been grub-stakin' him. Why would Dustin grub-stake him? The answer is that Dustin knows Shammy-skin's on the trail of somethin' good. . . ."

Stone snatched the book.

"There's more to it than you've guessed yet," he said curtly. "The man gives rather plain directions here. . . . If we've got sense enough to read 'em He hasn't given this book to Dustin, probably because he doesn't trust Dustin. Evidently he lost the book and those men Gray and Corse, up in that part of the range stealin' your cattle, happened to find it. Corse and Gray may or may not know what Kane knows. The main thing is . . . Find Kane and also find out, before we find him, what it is he thinks he's got. Let's see the directions again. . . ."

And he read:

"Red Water canon seven to one to white birch. Up Stinking Water three two to sunk can."

"By God, Frank! . . ." Carr sprang into life. "That sounds like whatever it is, is on Hour-glass land. . . ."

"Those are distances," said Stone sharply. "But what's he usin' as a unit? That's the question. It can't be a hundred-foot tape. I doubt if a prospector carries a watch. . . ."

They sat and stared at each other and Edith saw their faces change. From time to time her father and Crewe eyed each other but always their gaze came back to Stone. It was pretty clear that for some reason they were depending on this stranger to the Hour-glass. The mere fact that he and he alone had been able to put Carr in touch with

Gerald Keene made him of prime importance just now. Stone broke the silence with a sharp exclamation that was half oath.

"Well," said Crewe. "Spit it out. What's hit you now?"

"How far is it up to that place would you say?"

"Huh. You've been there. I'd say it's about twelve miles. Why?"

"Give me that book and you and Mr. Carr wait here. I want to try a notion of mine. It may not work. I'll be back by night."

Edith rose to her feet with a quick little exclamation.

"I'm going with you," she said quickly. "You don't want to take one of the men of course. Anyhow, they're all out. But I mean to go."

His eyes fought and found hers. He knew instantly that no distrust underlay her words. There was a lightness in her eyes and a quick smile on her lips that forbade any thought of guile. His own quick smile replied to hers:

"I'll sure take good care of you if you care to come," he said. "I'll get your pony, Miss Edith."

In ten minutes he was back with his big Isabella horse and her pony and they clattered out of the enclosure, past the corrals and turned into the open trail that led westward toward the foothills. Crewe and Carr stood watching them till their figures were swallowed up by the red dust.

"There's somethin' damn funny about that man Stone," quoth Crewe. "I'm satisfied he's as straight as they make 'em but he's sure something different from what he give out."

"He hasn't given out anything," growled Carr. "All I get is a notion of a husky fellow. He's never been range-trained. Anybody can see that but he's willing and he wants to learn. Of course he's a fool if he goes into the cattle business. To do that a man's got to have money to start it and if he's got money he's a double-dyed damned fool to put his money in any game that he don't know thoroughly. See?"

Crew "saw." He saw more than Carr said and he stood staring out over the flat at Edith and Stone as they turned westward and followed the tortuous line of wire-fence toward the hills.

Edith, too, wondered a great deal about her companion. He could ride. She knew that he was not afraid of any one or, as far as she saw, of anything, but that might be the result of ignorance, but his lamentable ignorance of all ranch matters was almost laughable at times. She half-turned in her saddle as his horse nosed up alongside the girth of her mount.

"You've been with us at the Hour-glass long enough for me to ask you some questions, haven't you?" she asked. A look in her gray eyes might have told him that those questions were not altogether prompted by idle curiosity.

"Sure. Go ahead," he said cheerfully.

"Where did you come from and how did you happen to land on the Hour-glass? You know Mr. Keene pretty well, don't you? You must know him well for him to have given you the letter that he did."

"He owns a big garage in Cato," he said non-committally. "That's where I saw him last. I've known him a good many years. When I learned about the ranch, I got him to give me the letter but when I got here the Hour-glass happened to need a man and I didn't need to use the letter."

"Did you work for Mr. Keene at the garage?"

"For a while, yes'm. . . ."

"Don't say 'Ma'am' to me," she said sharply.

"What'll I say then?"

"You might try 'Edith,'" she laughed. "Most of the others do."

"All right M' . . . I mean Edith. . . ."

They both pocketed and let it go at that and they let their horses out over the level. That long, treeless mesa swept away in mile after mile of pleasant grass-land dotted here and there with stunted mesquite and fire-tipped ocatilla and it pitched slightly up till its hedge was cut by a deep canon. Red Water canon that took its name from the

DON'T RISK BAKING FAILURES . . .

"DON'T TAKE CHANCES WITH INFERIOR BAKING POWDER. LESS THAN 1/2 WORTH OF MAGIC MAKES A FINE, BIG CAKE. AND MAGIC ALWAYS GIVES GOOD RESULTS."

says MISS ETHEL CHAPMAN, popular cookery editor of The Farmer.

Leading Canadian Cookery Experts warn against trusting good ingredients to inferior baking powder. They advise MAGIC Baking Powder for perfect cakes!

CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient. Made in Canada

discoloration of the stream due to some iron deposit.

"Up Red Water to Stinkin' Water . . . Funny names they gave the places," muttered Stone.

"Yes. . . ." Edith knew them well and was versed in the legends of the land. "They call the next deep valley Stinking Water because of its sulphur springs. The Indians named it many years ago. Even sheep won't drink the water there. . . . Here we are in Red Water canon. . . . Now what?"

Their ponies pawed at the yellowed soil and scornfully nosed aside the water in the shallow pools.

"Up the valley seven one . . ." he said reflectively, "to a white birch. . . . Then up Stinkin' Water three two to a sunk can. . . ."

(To Be Continued)

Little Helps For This Week

"Fear none of those things which thou shalt suffer . . . Ye shall have tribulation ten days; be thou faithful unto death and I will give thee a crown of life." Revelations 2:10.

Then O my soul be not afraid, On Him who thee and all things made Do thou all calmly rest; Whate'er may come, whate'er may go, Our Father in the heavens must know In all things what is best.

Guide me O Lord in all changes and varieties of the world, that in all things that shall happen I may have an evenness and tranquility of spirit, that my soul may be wholly resigned to Thy divinest will and pleasure, never murmuring at Thy gentle chastisements and fatherly correction.

Thou are never at any time nearer to God than when under tribulation which he permits for the purification and beautifying of thy soul.

Recalls Hard Journey

Calgary Man Walked To West Sixty Years Ago

C. J. "Con" Duggan, at 90, recalls how he walked to western Canada from northern Ontario 60 years ago.

Wading through creeks and muskeg, tormented by blackflies and mosquitoes and practically without food, he arrived at Fort Garry, now Winnipeg, 29 days after leaving Thunder Bay, at the head of the lakes.

He travelled the "Dawson route," made famous by Col. Wolseley's journey to quell the Red river rebellion in 1870, and used only once after Duggan's historic journey. He still has the ticket for which he paid \$10. On it is inscribed:

"Red river route, No. 241, department of public works, Canada. Depot: Thunder Bay, L.S., June 17, 1874.

"Good to C. J. Duggan for one passage from Thunder Bay to Fort Garry. (Signed) M. J. Carpenter and Co."

The party, consisting of 26 persons, had two teams and wagons, but this means of transportation was only sufficient for their baggage.

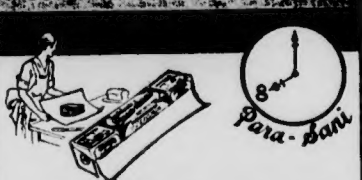

Blondes Score Again

Both gentlemen and the weather prefer blondes. Researchers at Massachusetts Institute of Technology proved by experiment that blonde hairs were the best for use in an instrument designed to test the humidity in the atmosphere.

Wax Grown On Trees

Wax is grown on trees by Chinese farmers, who have utilized the wax-making properties of a small Chinese insect. This insect spins cocoons of pure wax, and its masters have learned how to make it produce enormous quantities of the material.

A MORNING WITH M. E. CONOMY

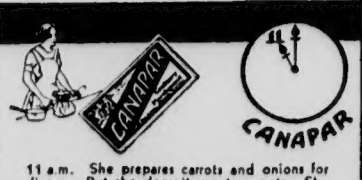

8 a.m. She makes up the children's lunches. "I wrap the sandwiches in Para-Sani Heavy Waxed Paper," she says, "because I know that Para-Sani will keep them fresh. In fact, I use Para-Sani from the green box a dozen times each day—for lining cake pans, keeping celery crisp and protecting food freshness and flavour."

9 a.m. She starts her dusting—but she no longer uses lint, dusty cloths. She uses Wonder Paper, which does dusting, cleaning and polishing all in one simple operation. Wonder Paper is among her most recent discoveries. "It saves so much time," she says, "and keeps my furniture brilliant all the time."

10 a.m. Mrs. E. Conomy, while at her kitchen table, needs a sheet of waxed tissue to cover an opened jam jar. Presto-Pack, a clever pack of waxed tissue that hangs on the wall and yields one sheet at a time, delivers the sheet handsily to her and she holds it on with an elastic band. Presto-Pack tissue has a hundred uses.

11 a.m. She prepares carrots and onions for dinner. But she doesn't use two pots. She wraps each vegetable in Canapar Cookery Parchment, puts both in the one pot, and puts them on a low heat. Canapar keeps each vegetable richly delicious in its own juices and eliminates all odors. "I line roast pans with Canapar, too," she says. "Fat won't burn—and I don't have to scour the pan. Cooking in Canapar also makes fish much more delicious and no odor escapes."

12 a.m. Her shelves need re-covering. She does that job with Handi-Roll, a 25-foot roll of paper. "Handi-Roll," she says, "is ever so helpful. I use it to line drawers, cover shelves, wrap parcels and dozens of other jobs that call for long sheets of paper."

J. E. Gooder - Editor & Manager

Correspondence.

To the Editor:

Kindly grant me space in your paper to reply to a letter written by Mr. Lew Wigglesworth in your edition of February 14th. May I say now that I enter this discussion in the spirit of friendliness, and do not wish to antagonize any of my fellow-citizens.

I wonder if Mr. Wigglesworth realizes the seriousness of the situation in which the average citizen, urban and rural, finds himself under this capitalistic system which is being protected by the laws of our country? For whose benefit? The citizens of the country? No, for the benefit of the financial interests, which include the banks and insurance companies, and they are in effect the mortgage companies. If Mr. Wigglesworth will take the trouble to read the evidence given by Major Douglas before the legislature of Alberta in their 1934 session he will find that is the conclusion Major Douglas has arrived at.

Let us look around for a moment and see what is happening to the farmers in this district, one of the best in Western Canada. We find foreclosures taking place on every hand; people are being driven from their homes after years of hard work and struggling to meet their obligations, in most cases losing all the equity they may have had in their homes, which in many cases runs into thousands of dollars. Now will Mr. Wigglesworth insinuate this is all caused by poor management and laziness on the part of these farmers? No, his intelligence will not permit him. What then is the reason? These are facts and must be faced. Let us not live in a fool's paradise and try to kid ourselves into thinking that we are miniature capitalists and defend the banks in their vicious policy of controlling the circulation of money and financial credit, and thereby controlling the price of agricultural products to the gratification of their own greedy purpose; driving the masses of the people into a state of peasantry, excepting of course a few, even farmers, who still consider themselves capitalists.

It is very difficult to understand the state of sanity some people get into when they are always willing to let the other fellow demonstrate the success or failure of all progressive measures and then ride into the benefits that may accrue on the back of the other fellow. Are we then cowards, afraid to go forward into the more or less uncharted regions of the future, blazing new trails in economic reform? At least we of the Social Credit "gang" (as it pleases my worthy friend to call us) are not, and we are going to demonstrate the success of Social Credit principles as far as they may be applied, constitutionally, right here in Alberta, by consent of the majority of the people.

Did not our soldiers in the Great War go forward with unprecedented valor, knowing that they were facing death? And what did they fight for? We were told they fought to save democracy and to end war, when in reality they shed their blood that greedy financiers and the munition manufacturers might add millions, nay, billions, to their fortunes. And who pays the bill? We common

people, a very few of whom class themselves as capitalists.

Now I say in conclusion, let us all go forward in this peaceful fight for economic justice and freedom. Let us not cross our bridges until we come to them, and when we come to the bridges we will cross them. If Social Credit should fail (as Mr. Wigglesworth implied that it would), then not the "Good Ship Capitalism" would be standing by, but the "Great Bear Capitalism" would still be waiting to take us in his all-powerful grip. The success of any progressive movement depends largely upon the degree of determination that is put into it—so we do not believe Social Credit could fail.

LLOYD HEIN

To the Editor:

It is interesting to know that the U.F.A. government is bringing Major Douglas back as a "reconstruction adviser." It took our government a long time to realize that the people of Alberta are determined to have Social Credit.

It is now ten months ago since Major Douglas gave his evidence before the Agricultural Committee in Edmonton, and for at least eight months after that the government maintained that nothing could be done in regard to Social Credit in Alberta, either constitutionally or otherwise. Why all the enthusiasm now, and all the ballyhoo of putting Social Credit into the U.F.A. platform? Doesn't the U.F.A. (or better called C.C.F.) know that they are advocating absolutely different principles in their manifesto from the principles of Major Douglas? The C.C.F. principles are: State Ownership or Socialization, Communication and Industry. In other words their policy is one of centralization of power in the hands of a few (Dictatorship). Social Credit principles are on very different lines. We stand for Private Ownership of everything, and Decentralization. We want to give the power to the people—where it belongs.

It is beyond my comprehension how the C.C.F. will combine those two contradicting principles and make us believe that they are in earnest about putting the Douglas Social Credit System into their platform. I would be much obliged if some responsible "C.C.F.-er" would explain to us.

Yours truly for Social Credit

Correspondence.

To the Editor:

Re your report of Town Council meeting published in your issue of the 21st inst. May I through the medium of your paper express my regret that the council has seen fit to ignore the request of the ratepayers to publish in the Pioneer a detailed report of all expenditures. Personally I feel that every motion passed at each meeting, giving the Yeas and Nays as well, should be published. If this had been done at the meeting held when the motion was passed to drill a well for the farmers, I am satisfied it would have been stopped by the ratepayers, and the town saved a loss of about twelve hundred dollars.

The above resolution was passed at the annual meeting after a discussion of the supposed "irregularities" mentioned in the council report, a majority of the ratepayers present favoring the resolution. I believe it is the feeling of the ratepayers that the council either accede to their request or resign. The council, as well as the school board, should at all times be willing to publish the proceedings of their meetings.

At the annual meeting I asked where the \$6,200 held in bonds came from. I was told that it was an accumulation of arrears of taxes. I have since learned that it was part of the money received when the electric light plant was sold some years ago. I also inquired as to the disposition of the \$2,984 surplus school monies on hand, but received no information. I understand that it has since been transferred to the credit of the town. This may be absolutely legal and correct in every way, but as we farm-owners outside the town limit contribute about one-fourth of the school taxes and are denied the right of even having a word to say as to the amount we are to be assessed or taxed (as we have no vote in the election of the council assessing our land), we should at least be given a detailed explanation as to how the school monies are disbursed. I also notice that the salary of the secretary-treasurer, as well as the wages of one town employee have been advanced to the old rates. May I ask why not raise the wages of the other employee, whose duties are more arduous and disagreeable and whose services have also been performed in a very satisfactory manner? The pay of these employees has been raised to the level of that of our high school teachers, and away above the level of our public school teachers, who devote their full time to their duties. Is this fair and equitable?

Yours truly

J. E. LIESEMER

[EDITOR'S NOTE—The writer of the above is incorrect when he says that no information was given regarding the surplus school taxes collected this year. It was stated at the meeting and also reported in the Pioneer that about one-third of the taxes collected were arrears and were used to recoup the town for the years in which the amount of taxes collected did not cover the amount paid in appropriation to the school board. He is also incorrect in his statement that the majority of those present favored the resolution regarding the publishing of all details of all expenditures in the Pioneer, the vote being 13 to 11 in favor. However, more than half of those present refrained from voting.]

With reference to Mr. Liesemer's remarks regarding the drilling of a well, it is interesting to note that Mr. Liesemer was a member of the town council at the time and that he personally moved the motion authorizing the work to be done. The following is an extract from the minutes of the council:

"Messrs. Fred Boulton and Noah Eckel appeared as delegates representing the farmers of East Didsbury and requested the council to contribute towards the drilling of a well and the placing of a pump and tank at the corner of the athletic grounds for the use of the farmers and others generally. Mr. Boulton, spokesman of the deputation, said that \$35.00 had already been subscribed by the farmers and that they would guarantee to canvas the farmers both east and west of Didsbury in an endeavor to raise half the amount required."

"After some discussion it was

moved by Councillor John Liesemer, seconded by Councillor Axtell, that the Town of Didsbury drill a well near the N.W. corner of the ball grounds, and use steel casing and good heavy stock pump and wooden troughs, pursuant to the petition of the farmers, contributions from the farmers to be thankfully received.—Carried."

Mountain View Notes

Calico Ball at Community Hall this Friday evening. Prizes. Calgary music. Gents 50c.

Mountain View W.L. members and friends met at the home of Mrs. Ellis Barnes on Thursday last. Mrs. J. J. Hill presided and the meeting opened with "O Canada," followed by repetition of the Creed and roll-call, after which the business session took place. The members brought the promised donations to the new layette, which were handed to Mrs. Barnes for disposal. Mrs. Bennie St. Clair was appointed Social Convener for the coming year. A short paper on "Immigration" was read by Mrs. Max Woods, after which the meeting adjourned. During the tea-hour a hearty clap was accorded Mrs. Ed. Blain, just returned from a 3-month tour to her old home in Idaho. All were delighted to see her back again with her cheery smile. The next meeting will convene at the home of Mrs. Ed. Barnes.

The local Social Credit Group is holding a box social and program on Tuesday evening, March 5, and the ladies are requested not to decorate elaborate boxes, as this means time and work, and the committee are asking that handkerchiefs be placed on boxes as a means of identification. So far the group has been very enthusiastic, and both president and vice-president, Messrs. Hughie Roberts and Ed. Liesemer, respectively, are working very hard in the movement and have many loyal associates.

84.21% INCREASE

84.21% more Salada Tea was sold in Western Canada in 1934 than in 1933. Public preference for finest quality tea made this huge increase possible.

'SALADA' TEA

Putting the World Together Again

A new book recently issued under the title "Courage For To-day" begins with a little story that has a lot of meaning in it. A man gave his small son a very elaborate jig-saw puzzle. It had been made by tearing a map of the world into little pieces. In a short time the child reported that the picture of the world was all put together. "How could you have done it so fast?" asked the father in amazement. "Oh, it was easy," answered the child. "You see, there was a picture of a man on the other side. When I put him together, the world was put together, too."

Men, and parties, and governments are all trying to put this old world together again. The number of plans and theories and policies advocated as the only way in which this gigantic task can be accomplished are beyond computation or classification. Speeches term with suggestions of all kinds, newspaper and magazine articles flow in an uninterrupted stream from the printing presses, books are piled upon books, all presenting the speaker's or writer's idea of the particular thing that must be done. To-day's brilliant suggestion is completely destroyed by to-morrow's contribution until practically all of us are in a fog.

Men of prominence, leaders of their fellow men, change their views over night and to-day are found denouncing that which they vigorously upheld and championed yesterday; whole nations almost in the twinkling of an eye abandon policies and forms of government which for scores of years, even centuries, have been accepted as traditionally sound and wise. One group declares that mankind must retrace its steps backward to the tribal communal state and so they declare for Communism. Another group says man must be deprived of those personal liberties won by him through centuries of struggle and must be regimented, controlled and ordered like privates in an army and be made to surrender all hope or right to profit above a standard form of living which may result from his individual initiative and efforts, and this group declares for State Socialism. A third group holds these other groups to be all wrong and adheres to the view that man is incapable of self-government, that democracy is an abject failure, and that only a selected few are wise enough, strong enough, capable enough to govern and that they should take full control into their hands, and retain it by force if and when necessary, and impose their will and ideas upon all others. They declare for Fascism and dictatorship.

Each and all of these groups fail to recognize and learn the simple lesson which the small boy with his jig-saw puzzle so quickly demonstrated, namely, that if man himself is made right the world itself will be righted. Business in the hands of dishonest men will be dishonest business, and its mere transfer from private to governmental control, whether Democratic, Communist, Socialist or Fascist, will not make business honest. There has been as much, if not more, graft and corruption, and just as many mistakes made, if, indeed, not more, under governments as there have been in public business. Private business has corrupted and bedevilled governments, but, so too, have governments corrupted, bedevilled and destroyed private business and made huge and costly blunders. In fact, governments, supported, even driven by their people, are more responsible for the present ills of the world than is private business as now constituted.

And who is responsible? Many an honest business man has been forced to adopt unethical, even dishonest practices, because his customers have demanded it of him. The same is true of high principled men entrusted with the duties and responsibilities of government. A government adopts a policy in the general public interest, it imposes a tax for the necessary purposes of government, and the average man and woman cudgel their brains to devise ways and means of evading the tax and escaping their responsibilities. One person smuggles to escape paying Customs duties, another swears to a false affidavit to avoid paying a gasoline tax, still another "doctors" an income tax return, and so it goes.

Completely changing the system will not effect a cure; it is man himself who must change. It is the human factor that is wrong, and until it is made right there will continue to be dishonesty and wrongs no matter what the system may be, and the larger the degree of power placed in the hands of a few the greater the wrongs will be because the greater the power the greater the opportunity for evil, and because the possession of power always leads to the grasping for more power regardless of the methods whereby it may be obtained.

Governments are created to govern a country; not to usurp the rights and destroy the liberties of the people. People should control and direct their governments; not the government control and direct the people. It is the duty and responsibility of governments to check and control the dishonest and eliminate wrongs and abuses imposed by individuals or groups of individuals upon others. That is the function of governments acting in the interests of all, but it is not a proper government function to interfere with or usurp the rights of individuals in the proper ordering of their own lives and in the carrying on of their legitimate occupations.

The inalienable rights of man are life, liberty and the pursuit of happiness. Life is more than money and business; liberty is much more than a regimented mode of existence and a stated standard of living; the pursuit of happiness must be left to the individual otherwise he cannot be happy. God conferred on man a mind and will of his own, and man must work out his own salvation, and, aided by such institutions as he may himself devise and set up to assist him, through education and otherwise, rise to higher things and nobler conceptions.

Politicians, financiers, economists, social workers,—all must come to a realization and acceptance of the fact demonstrated by the small boy's jig-saw puzzle, namely, that the speediest way to put this old world together again is to put man himself together as a Divine Creator intended him to be.

Helium gas, hitherto believed to be a monopoly of North America, has been found in Bulgaria.

The man who is honest with himself cannot help being that way with others.

W. N. U. 2082

A Resourceful Man

Forgetful Husband (to friend)—I want you to help me. I promised to meet my wife at one o'clock for luncheon and I can't remember where. Would you mind ringing her up at our house and asking her where I am likely to be about that time?

Killed Mountain Lion

Alberta. Man Had Narrow Escape When Beast Charged

What is presumed to be a mountain lion was killed the other day by Napoleon Whitford near McRae, 20 miles north of Ashmont, Alta.

The animal has short hair and of a light reddish brown color. The body measures close to five feet in length with a tail about two and a half feet long. The skin when stretched measured eight feet from tip to tip.

The animal was killed with a .22 calibre rifle, five shots being fired before the lion was stopped. The first four shots merely glanced off the beast's head, partly stunning it. It had turned on Mr. Whitford and was charging down on him when it was dropped by a bullet in a vital spot just behind the ear.

A three-year-old steer which was killed in the vicinity the previous night is believed to have been slaughtered by the lion. Tracks of four other animals, similar to the ones made by this one, have been seen in the same locality.

According to the oldest Indian in Ashmont, a mountain lion has never before been known to visit this part of the country.

SHE PLAYS ORGAN AT 75 YEARS

Takes Kruschen To Keep Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states:—

"My hands were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and am very pleased with the result. Last August I played two church services on the organ, and hope to do so again this August. My fingers are nearly straight, and quite supple, and I am 75. I have recommended Kruschen Salts to many people."—A. A. C.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

Chemists have succeeded in coloring wallpaper so that it will not be faded by light.

INFANTS' COLDS Relieved!

Young children easily catch cold. So Mrs. Russell Ward, of Hilton Beach, Ont., wisely says: "If I notice that there is any sign of a cold I give Baby's Own Tablets and find they are a great help." Thousands of mothers do the same not only for colds but for fretfulness, indigestion, constipation, teething troubles, colic, upset stomach and so on. Baby's Own Tablets are safe and sure in relieving childhood's common ailments. Price 25c.

Dr. Williams' BABY'S OWN TABLETS

Color Does Not Matter

The color of honey which varies from water-white to a very dark brown does not affect its food value in any way. The difference in color is caused by the absorption of light in varying degrees by certain substances in the nectar of the different flowers.

BUSINESS ON THE UPTURN

A definite indication that conditions are improving and that business is on the upturn is shown by the fact that the Salada Tea Company sold over 84% more tea in Western Canada in 1934 than in 1933. This is especially significant since Salada is a quality tea.

The Black Forest, or Schwarzwald, of southwestern Germany, has an area of 1,800 square miles. It is a favorite spot for tourists, and derives its name from the dark hue of the firs that grow in the region.

The head and tail of the Australian stump-tailed lizard are so nearly alike that it is difficult to tell them apart.

NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!

1. Crush and stir 3 Aspirin tablets in a third of a glass of water.

2. Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat—do not rinse mouth.

3. If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

Rawness, Irritation Go at Once
Note Directions for
New Instant Treatment

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 Aspirin tablets in $\frac{1}{3}$ glass of water and gargle with it twice.

Aspirin tablets disintegrate so completely no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this fundamental treatment instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM
THE HEART

The Hero's Reward

Did Not Even Get Thanks For Brave Deed

Heroes are born not made. There was one of them on a street at Baltimore, Md., the other day. He was dawdling on the sidewalk when he saw some children in a parked motor car release the brake and the car started rolling down a hill, while their mother stood distractedly on the sidewalk.

In an instant he took in the situation and the frightful tragedy that might ensue. He rushed after the car, caught up, leaped in and put on the brake but not before the car had gone careening upon the sidewalk. Medals have been awarded for less, but in this case a policeman rushed up and the hero had great difficulty escaping arrest for reckless driving.

And when the distracted mother arrived, her only comment was: "Please will you put the car back where you got it from as quickly as possible? If the children's father discover it's gone, he will be simply furious."—Brandon Sun.

There Is Another

The Border Cities Star says: "Every man on the street," City Solicitor Bruce J. S. Macdonald tells the Lions Club, "thinks he could step into public office and handle the job better than the man who is in. It is the only business I know where that attitude exists." Ah, but there is another one, Mr. Macdonald. It is the newspaper business.

Western North America's dark crow is mostly white.

Weird Happenings

Strange Phenomena Attracts Attention At Home Of Ontario Farmer

Weird and unearthly happenings at the home of Joseph Quinn, farmer, residing in North Burgess township, about 14 miles from Perth, Ont., have aroused the countryside for miles around. Stones flying through the windows, thrown apparently by no human hand; irons used for pressing clothes walking downstairs of their own volition; a teapot which jumped off the stove into the woodbox; pictures tumbling from the walls without cause, and other mysterious happenings, have focused the attention of the neighborhood.

So serious has the matter become that Ontario provincial police visited the home to investigate. Many persons in the neighborhood vouched for the truth of the happenings.

Not Due To Luck

The victory of Wolfe at Quebec was not due to luck in finding the path up the steep surrounding cliffs, but to the thorough work of a British spy known as "This Intelligent Gentleman." This spy furnished Wolfe with complete plans of every detail of the city. Wolfe died with the map in his hands.

An anti-peritonitis vaccine has been called a 100 per cent. success after 1,000 tests. It assembles the whole corpuscles where infection may set in.

Sign in a San Francisco cafe: We know that your check is good, but we don't trust the banks.

Guard against Rickets with Cod Liver Oil

All babies need the anti-rachitic value of Vitamins A and D, found in pure cod liver oil. Scott's Emulsion is rich in these Vitamins, PLUS the easy digestibility that results from Emulsification. PLUS the body-building aid of hypophosphites of lime and soda. Pleasant to take, Scott's Emulsion is tremendously more effective.

SCOTT'S EMULSION

Dominion Government Carries Medical Aid To Arctic And Sub-Arctic Areas

The provision of medical care for the native inhabitants of the Northwest Territories is a responsibility of the Dominion government. For thousands of miles along the Arctic coast of the Dominion, in fair weather and in foul, government medical officers bring their healing art to the aid of our Eskimo citizens, while inland, Indians, half-breeds and indigent whites are also given medical aid. Winter and summer patrols of hundreds of miles are not unusual and nearly every mode of transport known to the north country—airplane, steamboat, motor boat, canoe, and dog-sled—has been used to extend the service.

In all eight doctors are employed in this work. Dr. J. A. Urquhart, stationed at Aklavik in the delta of the Mackenzie river, is Canada's farthest north practitioner, while the other doctors are stationed as follows: Dr. A. G. MacKinnon, at Pangnirtung, Baffin island; Dr. J. M. Morrow, at Fort Smith; Dr. L. D. Livingstone, at Chesterfield on the west coast of Hudson bay; Dr. T. O. Byrnes, at Cameron Bay, Great Bear lake; Dr. C. Bourget, at Resolution, Great Slave lake; Dr. P. W. Head, at Good Hope, on the Mackenzie river; and Dr. W. A. M. Truesdell, at Simpson, near the junction of the Liard and Mackenzie rivers.

As the department primarily responsible for the administration, including the care of the Eskimos, of Canada's vast northern possessions, the Department of the Interior of which Hon. Thomas G. Murphy is minister, contributes a major portion of the cost of maintaining doctors in the Far North. That this work among the Eskimos is bearing fruit is shown by the reports of the doctors stationed in what is termed Eskimo territory. While civilization has brought many benefits to these natives, its contact with these happy and hospitable people has also resulted in a number of ill effects. Although a healthy and organically sound race, the Eskimos are seriously susceptible to ailments which ordinarily cause white people only minor discomforts. Before the coming of the white man the Eskimos were isolated along Canada's Arctic coast, and they knew nothing of the common ills of the newcomer—colds, influenza, and other kindred ailments. There had been no need for their bodies to build up a resistance to the attacks of these diseases. Consequently the arrival of the first whaling and trading vessels each season was followed by widespread outbreaks among the natives, with often disastrous effects.

To-day the medical services in the Far North take particular care upon the arrival of the first ships to check the spread of these diseases and the hope is that in time, as closer contact is made with the outside world, the natives will have built up the necessary resistance to ward off such attacks.

By painstaking instruction, the doctors have reduced considerably the number of deaths due to dietary causes. The most striking success has been in the correction of methods of feeding infants and older children. In the Mackenzie River area it was not uncommon for ninety per cent. of the cases treated at the mission hospitals to be due to wrong feeding during the spring muskrat season. This has been almost entirely corrected.

By the setting aside of preserves for the use of the native population only, the Eskimos are being encouraged to follow as much as possible their natural pursuits. Every effort is being made to have them continue their hunting of the seal and caribou so that the necessary proportion of fats so necessary to meet the rigours of the far northern winters may be maintained. Thus the ill effects of too great a dependence on white man's foods are being counteracted. In other ways the health of the natives is being safeguarded and improved through the watchfulness of the Department of the Interior, the benefits being derived from the

Eskimo's contact with civilization are preserved and any harmful effects overcome or avoided.

Eclipse Of The Sun

In 1935 There Will Be Seven Eclipses Of The Sun And Moon

Seven eclipses of the sun and moon, an unusually large number, take place in 1935. Two will be visible in Canada and the United States.

The first of these is a partial eclipse of the sun on February 3. At maximum, seven tenths of the sun's diameter will be covered by the moon's shadow, enough to chill the air and turn the sunlight temporarily—greenish-yellow.

This maximum shadow will cover the United States west of the Rockies, and nearly half of western Canada. In the rest of the United States and Canada it will be less, a smoked glass spectacle.

The second eclipse visible in Canada and the United States will come on July 16, a total eclipse of the moon.

"There will be this year the rare happening of the maximum number of eclipses that can occur in one year," says Herbert C. Wilson in popular astronomy.

"There are five of the sun, two of the moon. There might be four of the sun and three of the moon, but there never can be a total of more than seven."

Defective Teeth

Scientists Find Trouble Comes As Aftermath Of Severe Rickets

A new clue to causes of faulty tooth development, showing defective teeth often are an aftermath of severe rickets, the bone disease of childhood, was reported by the children's bureau at Washington.

Scientists of the bureau, in examining two groups of children, one of which had had severe rickets in earlier years, and another which had been practically free of the disease, found many more defective teeth among the children who had been rickets victims.

The study proved some defects in development of teeth can be greatly lessened and usually prevented by giving children frequent sun baths and plenty of cod liver oil when they are at the ricket age, the scientists said.

Lark Is Destructive

Farmers In England Not Very Keen About Songster

Even if Shelly wrote an ode about it and Schubert was inspired by it to compose a beautiful melody, the lark is just a bird that damages wheat and other crops. So declare the farmers in the vicinity of Norfolk, England, and they have started a war on the songster. The Norfolk Agricultural Committee has excluded the bird from the new order under the Wild Birds Protection Act. Anyone therefore may shoot it and have lark pie. "The skylark is a nice bird, but we don't live by listening to its music," said George Hewitt, an agricultural leader. The larks are said to invade England in flocks from Germany and Russia.

Incentive To Growth

What a grand incentive to growth, development, and service is the thought that life is to go on for ever—that we are not acquiring knowledge for this state of existence only, but that every truth of God which we learn, every experience through which, in the Divine leading, we are called to pass, has its part in the building up of a character which shall never die.—Francis Thompson.

Standardized grading appears now to have become definitely established as a permanent factor in practically all phases of the poultry trade in Canada.

Stratosphere explorers say the sky appears to be a deep purple at the great heights to which some of the stratosphere balloons invented by scientists have risen.

U.S. Shelter Belt Plan

Four Million Trees To Be Planted Next Spring

Four million trees will be planted next spring, it was announced at Washington, as a start on the forest service's vast shelter-belt designed to sweep from Canada to the Texas peninsula.

The American Tree Association declared that 23 of 30 plantings areas had been selected tentatively each calling for plantings of 139,000 trees in strips five miles long and 10 rods wide. They will be established in the Dakotas, Nebraska, Kansas, Oklahoma and Texas.

Designed to provide windbreaks for cultivated land, the project was endorsed by President Roosevelt and set in motion with an allotment of \$1,000,000 in 1934. When completed it will provide a belt of trees planted in the 10-rod wide strips over a 200 miles wide area.

The Same Firm

At a rural railway station one man acted as stationmaster, signalman, porter, and ticket collector. Even then he sometimes had a little time to spare. A passenger one morning found him sweeping the little platform with fierce energy, "Why, my man," said he, "you're going about your job as though this were Paddington station." "Same firm, sir," replied the man, briskly saluting and resuming his sweeping.

Chemists are trying to learn the secrets of the molecule, just as physicists are trying to learn the structure of the atom.

Renowned Varieties Of Grain Now Grown In Canada An Epic In Scientific Achievement

The Noise The Weevil Makes

Magnified Ten Thousand Billion Times It Created Some Stir

A boll weevil, cause of so much sorrow to farmers of the south, was a star performer for science in New York.

The noise the weevil makes when "chewing" was magnified by a "sound microscope"—10,000 billion times and the noise was so great that it could be heard all over one of the buildings at New York University.

Dr. E. E. Free, who demonstrated the "sound microscope," said he did not dare use the device in connection with any sound normally heard by the human ear.

The purring of a cat, if amplified 10,000 billion times, he declared, could be heard in San Francisco without the aid of telephone or radio.

A Very Bad Habit

Thousands of people remain pygmies all their lives because they never dare be themselves. They are afraid to take the initiative. They ruin their judgment by not using it, by depending upon others, running to them for advice, and always following the track marked out by some one else. They are mere echoes, trailers.

The SNAPSHOT GUILD

Respect Your Box Camera

Don't think for one minute that you cannot use your box camera in the winter. The snow scene was snapped with a box camera, using the second stop. In the fire-side scene a time exposure of one second was made, using the largest stop, with the aid of three photoflood lamps.

Thousands of people of all ages are very much interested in the fascinating hobby of picture taking, own box cameras but, believe it or not, have permitted an inferiority complex to creep upon them, as far as respect for the performance of their cameras is concerned. Now that really sounds ridiculous. It is true, nevertheless. Readers have written to the Snapshot Guild with a tale of woe about waiting for spring to arrive to make a concerted effort to improve their pictures. So many owners of box cameras seem to be of the opinion that the sun must be shining like blazes before they should try to take a picture.

What is to follow is directed right straight at you, and you and you... with a box camera. If it is hibernating in peaceful slumber on the closet shelf awaiting the arrival of spring and bright sunshine, go get it, dust it off—and be sure you wipe off the lens carefully with a soft, dry cloth—get yourself a roll of film and start shooting. There are more interesting winter pictures waiting to be made with a box camera than you will ever be able to take if you live to be as old as Methuselah. Remember, too, that the old Biblical passage still holds good—"Seek and ye shall find"—and it will not take much seeking if your eyes are open.

Under ordinary conditions you can take instantaneous snapshots outdoors in the winter, or, if the day is too dark and dreary, there is always the old reliable time exposure. If the day is clear and bright you can take action pictures providing you snap the picture at the right angle and are not too close to the object.

Pictures can be taken indoors at night with a box camera if you use one of the inexpensive photoflood lamps. A little experimenting may be necessary until you know what you can and cannot expect from your box camera, and if you are a real

amateur you will get a lot of pleasure out of the experimenting.

The fellow with a lot of fine equipment doesn't deserve half the praise for an unusual picture as the real amateur, who owns a box camera and who, through perseverance and thought, gets a "knockout" picture under adverse conditions. Look at the heading of this column this week. If you have belittled your camera by discarding it for the winter you owe it an apology for forcing it into the army of unemployed.

The average box camera on sale to-day has two stops and a time exposure adjustment. The stop openings control the amount of light passing through the lens. Number one—the larger stop, or opening, is for snapshots of ordinary subjects in sunlight. The second opening, or smaller stop, is for snapshot of distant views, beach scenes, now without prominent dark object in the foreground, and clouds, only, in bright sunlight. During the winter, on days with hazy sunlight it is best to use the first, or large stop and on dark days use the second stop and a very short time exposure.

When making time exposures the camera must be placed on a tripod, table, fence or something solid so that the camera will not move when the picture is taken.

You are overlooking a lot of pleasure if you are not making use of your box camera, so get it out. If you are really interested you can stop in most any store that sells cameras and photographic supplies and get free literature on taking pictures at night indoors during these long winter evenings, and you will find it is one type of indoor sport the entire family will enjoy.

And speaking of the family—that's a hunch for a mighty important picture. You will have a lot of fun taking a picture of the family group and in later years the result will be numbered among your prize possessions. Try it.

JOHN VAN GUILDER.

The continuous success of Canadian farmers in international and world grain shows calls attention to the fact that among the various factors contributing to Canada's distinction as an agricultural country is the availability of many varieties of cereal grains of outstanding worth. It was not always so. For 270 years following the landing of Louis Hebert, Canada's first farmer, in 1617, the varieties available were largely imported and however well adapted they may have been to the soil of their native countries, it became evident that if Canada's newly opened wheat belt was ever to attain a position of prominence it must have a variety of wheat capable of maturing earlier than Red Fife which was then commonly grown. Indeed, this imperative need was one leading reason for the establishment of the Dominion Experimental Farms in 1886. How well they have discharged their high duties in originating, among other things, the renowned varieties of grain now grown in Canada is an epic in the realms of scientific achievement. To-day the Canadian farmer has the choice of outstanding varieties of spring wheat, fall wheat, oats and barley, while at the same time the Dominion Experimental Farms still pursue their important role which is of incalculable value to the Dominion. There are promising new varieties now under test, such as rust-resistant wheats and oats, as well as certain barleys, possessing characteristics of immense practical importance, giving every indication of being destined to be included in the near future among the now famous varieties of the Dominion of Canada.

Animals Play Like Children

Most Young Ones Are Fond Of "Tug-of-War"

Animals play games of their own invention, as children do. Most young animals are exceedingly fond of "tug-of-war." Young foxes are particularly addicted to this form of sport, pulling against one another with might and main, and every dog lover has seen terriers doing the same thing. Otters are fond of "shooting the chute" down a slope already well worn by generations of "shooters." Naturalists say that badgers play "King of the Castle" by moonlight. One of them mounts to the summit of a hillock and holds it against all comers, the badger who drives him off taking his place until he, too, is dispossessed. They play in perfect good temper for hours at a stretch. Lambs are often observed to play a similar game. Both cats and dogs play hide and seek. A dog and a cat in the same house will thus play together, but the cat always hides and the dog finds.

Time-Well Spent

Occasional Breathing Spaces Make Day's Work More Efficient

Immediately after breakfast, just sit still for a matter of ten minutes or so before plunging into the day's activities. This makes all the difference between being worn out and fresh at five o'clock in the afternoon. During the morning, don't say: "I haven't a moment to spare." Sit down and have a cup of tea or coffee at eleven o'clock. You will go on with your work with renewed vigor.

When travelling, if you can spare time, go into the refreshment room and have five minutes' rest and something to eat and drink. When shopping, don't tear from one shop to another without pausing, so that, at the end of the day, you are done up and ready only for bed. When reading a book, pause every now and then and think over what you have been reading. This will rest the eyes and make the book more enjoyable.

Children Under 14: 20c

Week in the Legislature

By T. B. Windross

Edmonton, Alta.—The week in the Alberta Legislature has been dull as far as oratory goes, although some good solid speeches have been made on both sides of the house. There has been very little of the cross firing usually associated with the debate on the reply to the speech from the throne.

This doesn't mean, however, that there has been none of the livelier incidents so much enjoyed by the spectators in the galleries. L. A. Giroux of Grouard, (Liberal), Hon. Perrin Baker, minister of education, A. M. Matheson and others have joined in some quick repartee at times, but nothing of a bitter or unpleasant character has spoiled the general good feeling that has prevailed throughout the debate.

Very little legislation, and none of a very important character has as yet been brought before the members, and no bill has yet passed the second reading or committee stage. The debate on the throne speech will conclude this week and that will leave the members free to get on with the more solid work of the session.

With the elections in view this summer it is to be expected that all parties, government and opposition will have much to say for the benefit of the electors, but that phase of the proceedings has not yet begun.

So far the speeches of the opposition have been largely occupied with criticism of the government's policies and actions, in some cases it has been charged with inaction, speakers seeing things through the colored glasses of their party policies usually. There has been very little of a constructive kind offered in the oratory. But that is a usual feature of the early stages of the sessional proceedings.

During the week great interest has been taken in the office of the sergeant-at-arms, the holder of which for upwards of 21 years, Mr. J. W. Turner, was compelled to be absent through failing health part of the time. Friday he was back on the job once more and performing his duties with his customary dignity and efficiency, despite his 81 years.

The government appointed an assistant sergeant-at-arms for the session, Neil McLean, member of the Liquor Commission's enforcement squad getting the honor.

Thursday night Hon. George Hoadley, minister of trade and industry, took occasion to reply to the opposition critics of the government and explained some of the conditions that had confronted the department in its early stages. Conservative and Liberal speakers as well as Labor members had spoken of what they said was the "inactivity of the government in connection with getting the work of this department started" and Mr. Hoadley defended his administration of the new department pointing out that it had been needful to thoroughly investigate every possible avenue of activity before launching out any aggressive policy. But he promised action would be satisfactory when the time was ripe.

Several speakers stressed the necessity of doing something to enlighten the burden of debt that weighed down on the farmers, and to lift the burden of high interest rates from the shoulders of the people generally. The government assured the house through its speakers that it had not been idle in this matter and would not be indifferent to the needs of the people. Much will depend on the action taken by the federal government in this direction, however.

Announcement was made during the week through the public press that the government had engaged the services of Major C. H. Douglas, British economist, as economic adviser on social credit to the government. He will spend some time in the province early this summer and assist the government in its efforts to relieve the people of some of the heavy economic burdens that oppress them.

Former Premier J. E. Brownlee, has occupied his seat in the house during the week, but is likely to be away from Edmonton for three or four days this next week, his physicians having advised a brief trip to the coast in order to overcome the effects of a recent severe cold. Mr.

WEEKLY JOKE

The inspector of schools came before a class of girls. He wrote on the blackboard "LXXX". Then peering over his glasses at the good looking girl in the first row, asked, "Young lady I'd like to have you tell me what that means."

"Love and kisses," the girl replied.

Brownlee will take no part in the debate on the throne speech, but he will be heard during the budget discussion when that piece of legislation is brought down to the house.

T. B. Windross.
